E: estimated concentration falling between the laboratory reporting limit and method detection limit. These values are included as reported by the laboratory in summed concentrations (last two columns).

FB: field blank sample; FD: field duplicate sample.

NOTE: ng/L (nanograms per liter) is equivalent to parts per trillion.

B: analyte detected in associated method blank.

75

E: estimated concentration falling between the laboratory reporting limit and method detection limit. These values are included as reported by the laboratory in summed concentrations (last two columns).

FB: field blank sample; FD: field duplicate sample.

NOTE: ng/L (nanograms per liter) is equivalent to parts per trillion.
